

NEW CD: ARTISTS FOR ARTISTS ,Christmas Doheem' - A project supporting local artists & music scene in Luxembourg

In a time where it has become nearly impossible for artists to perform live in front of their beloved audiences, it's more important than ever to stay positive and get creative! As this Christmas season will surely be quite different from any that we've ever experienced, Steven Pitman & Lata Gouveia have come up with an idea on how to bring some much needed Christmas spirit into peoples lives/homes and, at the same time, create some financial support for the artists involved.

Together with some well known independent artists we are creating a new CD which will feature Christmas songs, interpreted by artists that have had to deal with countless cancelled concerts and financial losses since March due to the COVID pandemic. The CD will contain 12 songs by as many artists and will be ready in early December. Our goal is to sell as many CD's as possible before Christmas and this will serve to help the participating artists financially.

We are very happy to be officially supported by the **,Ministère de la Culture'** and since such a project is almost impossible to realise without additional help we would now like to ask for your support.

How can you support?

We are also asking small, medium and large size companies, enterprises and organisations to make a contribution and/or consider purchasing the CD's as Christmas gifts for their workforce, partners and customers. By doing this they'll be supporting the local artists and music scene during theses difficult times. Please see attached ,Order Form' for available CD-packages.

We hope to have sparked your interest and thank you very much for your support!
